New York, NY | (248) 463-0799 | mksalmanpers@gmail.com | www.linkedin.com/in/MalikMal

EDUCATION

New York University, Tandon School of Engineering

New York, NY

MSE Urban Data Science, GPA: 3.9/4.0

May 2025

- Coursework: Causal Inference, Applied Data Science, Machine Learning for Cities, GIS, Disaster Risk Analysis

University of Michigan, College of LSA

Ann Arbor, MI

BS Interdisciplinary Physics, GPA: 3.5/4.0

May 2023

- Coursework: Linear Algebra, Differential Equations, Urban Planning | Exchange Program: National University of Singapore

PROJECT EXPERIENCE

Rail Corridor Reactivation — Ridership & Community Impact Analysis (QueensLink)

New York, NY

Team Co-Lead

Sep 2024 – May 2025

- Framed and scoped a planning engagement for a transit nonprofit evaluating reactivation of a dormant Southern Queens rail corridor, structuring the analytical approach, defining deliverables, and managing client communication across a multi-month engagement.
- Built scenario-based demand models and geospatial analyses integrating ridership, demographic, and equity data across multiple route alternatives, translating outputs into route selection and investment prioritization recommendations for city planning and advocacy stakeholders.
- Identified G train extension to Forest Hills as the optimal scenario based on system-wide connectivity analysis; findings will be featured in QueensLink's joint economic and ridership report (2026).

U.S. Open Economic Spillover Analysis (NYU RUN Lab)

New York, NY

Team Lead

May 2024 – Nov 2024

- Independently scoped and led a city-scale evaluation of the U.S. Open's neighborhood economic spillovers, structuring the problem, selecting methods, and managing the analysis from hypothesis through final deliverable.
- Applied DiD with spatial lag controls to millions of Placer commercial visitation observations; found no measurable impact on surrounding Queens neighborhoods and developed a demographic mismatch hypothesis to explain and contextualize the null result for city agency stakeholders.

Cycling Behavior & Infrastructure Equity Analysis (NYU RUN Lab)

New York, NY

Methodological Lead

Sep 2024 – Jul 2025

- Designed the analytical framework for a study evaluating the equity impacts of NYC bike lane investments, applying Propensity Score Matching and Difference-in-Differences across millions of Citi Bike trip records and sociodemographic datasets.
- Translated findings into policy-relevant insights used by city agencies and advocacy organizations; co-authored manuscript under review at *npj Sustainable Mobility and Transport*.

PROFESSIONAL EXPERIENCE

Center for Urban Science and Progress, New York University

New York, NY

Assistant Research Scientist — Resilient Urban Networks Lab

May 2024 – Jul 2025

- Coordinated analytical deliverables and stakeholder communication across two concurrent applied research engagements — a transit corridor reactivation feasibility study and a city-scale economic impact evaluation — managing workstreams from scoping through publication.
- Produced policy-ready briefings and reports for city agencies and nonprofit partners, translating geospatial and causal analysis into actionable planning and infrastructure investment recommendations.

University of Michigan Museum of Natural History

Ann Arbor, MI

Program Instructor

May 2023 – Aug 2023

- Designed and delivered public-facing STEM programs for diverse audiences, collaborating with scientists and educators to tailor content and format based on participant feedback.

Global Scholars Program, University of Michigan

Ann Arbor, MI

Assistant Instructor

Sep 2021 – Apr 2023

- Guided an 8-person student team through a pro bono consulting engagement with ALPHA Education, managing scope definition, client communication, and deliverable quality across the project lifecycle.
- Facilitated workshops on intercultural collaboration, DEI, and conflict resolution.

RELEVANT SKILLS

Technical: Python, GIS & Spatial Analysis, Quantitative Modeling, Data Visualization, Machine Learning

Consulting: Structured Problem Framing, Stakeholder Alignment, Client Communication, Research-to-Recommendation Translation
